Product Solutions for Medical Lubricant Coatings

Application and Product Selection Guide

Proven Performance. Trusted Expertise.

Advancing healthcare through material innovations
**Supporting You and Your Medical Materials**

As part of the global healthcare industry, you need medical lubricant coatings you can rely on. Dow Corning can help you meet your functional, regulatory and processing needs with both well-established and next-generation medical materials that offer excellent performance.

For many years, Dow Corning has supported the healthcare industry with a comprehensive range of high-quality silicone coating materials. We are also committed to supplying these products, providing technical expertise and supporting the advancement of these applications and innovations in the years to come.

## Products and Features

**Dow Corning® 360 Medical Fluid**
- Silicone lubricant for glass, plastics, rubbers, metals
- Water repellent/hydrophobic
- Can be spray-applied undiluted
- Can be diluted in solvents for bath treatment
- Pyrogen controlled
- Tested to meet all the requirements of the Dimethicone NF monograph — and, depending on the fluid’s viscosity, the “Dimeticone” and the “Silicone Oil Used as a Lubricant” European Pharmacopoeia (Ph. Eur.) monographs
- Certificate of Suitability held for both Ph. Eur. monographs, and a Drug Master File is maintained with the United States FDA

### Benefits
- High water repellency/hydrophobicity
- Excellent lubricating characteristics
- Manufactured in a dedicated healthcare facility

### Product Description
- Clear, colorless polydimethylsiloxane (PDMS) liquid

### Typical Applications
- Siliconization lubricant
- Hydrophobic lubricant for glass, metals, plastics, rubbers
- Demolding agent

¹ More information: http://echa.europa.eu/documents/10162/4ba9ca4c-c00b-4e90-8d51-d8efdd1e0aef. The list at the link above includes the OPE (octylphenol ethoxylate) class listed there as “4-(1,1,3,3-tetramethylbutyl) phenol, ethoxylated [covering well defined substances and UVCB substances, polymers and homologues].”
**Dow Corning® 365, 35% Dimethicone NF Emulsion**
- Aqueous siliconization emulsion that contains 35% Dow Corning 360 Medical Fluid, 350 cSt
- Avoids the use of flammable and/or ozone-depleting organic solvents

**Dow Corning® 366, 35% Dimethicone NF Emulsion**
- Waterborne silicone fluid for lubrication and siliconization of glass, metals, plastics, rubbers
- Not formulated with OPE surfactant
- Not formulated with parabens
- Contains 35% NF Dimethicone

**Dow Corning® MDX4-4159 50% Medical Grade Dispersion**
- Functional silicone capable of bonding with many substrates
- Especially suited for siliconization of metals (e.g., needles and cutting edges)
- Cures at room temperature on exposure to atmospheric moisture
- Applied by wiping or dip-coating with a diluted solution

**Dow Corning® Q7-9180 Silicone Fluid**
- Volatile linear silicone fluid
- Diluent for Dow Corning 360 Medical Fluid and Dow Corning MDX4-4159 50% Medical Grade Dispersion
- Non-ozone depleting
- Cleaning agent for medical materials and equipment

Focusing on What Matters Most to You

You want a responsive and flexible global supplier with the material and service support you need to succeed. That’s why we provide:

- Consistent quality and safety of materials
- Stability and reliability as a material supplier
- Innovative solutions and collaboration with you
- Supportive regulatory practices
- Unique silicones, with properties that make them suitable for many healthcare applications

Contact Dow Corning

When you need innovation and expertise, Dow Corning can help. We are dedicated to meeting your needs for specialty materials, collaborative problem solving and innovation support. We have state-of-the-art application center laboratories in our facilities. Learn how we can help you at dowcorning.com/healthcare.

Your Global Connection

Dow Corning has sales offices and manufacturing facilities worldwide, as well as full-service, global technical support. Contact us today by visiting dowcorning.com/ContactUs.

Consistent Quality

From lot to lot, year after year, you can be sure the products you order from Dow Corning will live up to their specifications.

Many Dow Corning materials for healthcare, including those described in this brochure, are manufactured in a dedicated, FDA-registered (CFN 1816403) and inspected facility that uses appropriate current Good Manufacturing Practices (cGMPs) for the intended applications.

At the Healthcare Industries Materials Site, special attention is given to producing products that meet the highest quality standards. This is achieved through:

- An integrated supply chain and full documentation (from raw material testing through production, to final testing and lot sample retention) to ensure complete traceability of our materials
- Meticulous control and documentation of change, as well as a policy of notifying customers of all significant changes
- Rigorous procedures for cleanliness to ensure high product purity
